Subject: RE: need help
Attachments: IRIS MYA Table 1 and 2 Updates June 2018.xlsx

Hi Tina – Attached to this email is Table 1 and 2 revised for 2018 (Sheet 1 and 2 respectively in the document). I wrote the “current status” as generic as possible (not sure if this will be shared). Kris should weigh in as well, specifically on Table 2. These are our “new starts.” The current status for those chemicals is mostly “developing evidence maps...” Is this ok to say? Kris, Amanda, and I have been going back and forth on a list of chemicals.

Let me know if you have comments or if any revisions are necessary.

Can you give me a ‘current’ status on the chemicals on table 1 and 2?

Correct. Table 1 is the list of chemicals we are currently working on and Table 2 is the chemicals that we will start in the coming years (i.e., the slide you sent me this morning). The timeline document is meant to update Table 1. Since 2015, we have stopped working on or finalized a number of chemicals that are listed in the image below.

I can recreated a condensed version of the table below from the Timeline document. There just won’t be any dates.

Not exactly – the agenda has a Table 1 and a Table 2. The one on the slide is one of them, right? What's the other one?

Hi Tina – Just to confirm, are you asking for the raw Multi-Year Agenda data? See attachment. This is the compiled list of feedback we got from the program and regional offices in 2014.

Dahnish,

You know how we use this multi-year agenda slide for most meetings? For the Wheeler briefing, he may want to know what does the full MYA look like the rest of the chemicals on the multi-year agenda. Can you give those to me? I know they may not fit on a slide, so a table is OK – we'll keep it in our back pocket.

Thanks,

T.
